

TEXAS.GOV SECURITY

Protecting your constituent data

Proven

Since inception in 2000, the Texas.gov program has securely processed **175 million+ online transactions** worth **\$25.5 billion+** on behalf of state and local entities.

We partner with **200+ publicly-funded state and local government agencies**, ensuring that **1,000+ online and over-the-counter services** securely process payments and safeguard constituent data.

As threats to user data grow and regulatory compliance becomes more complex, Texas.gov sets the standard for proven, compliant payment systems, with the scalability to meet your needs.

Robust

Texas.gov provides a robust enterprise payment platform designed specifically for government. It is powered by an electronic payment engine developed by our parent company, NIC, and currently used by 28 states and hundreds of local governments. **In 2011, NIC securely processed more than \$17.8 billion in government payments.**

The Texas.gov payment solution features:

- ★ PCI Level 1 and SAS 70/SSAE 16 compliance
- ★ A fully redundant environment with secure, controlled access
- ★ Quarterly perimeter security scans from an approved security firm
- ★ Regular internal and external vulnerability assessments

Compliant

We understand that protecting the personal data of constituents is essential for government organizations. Texas.gov maintains a formal, comprehensive security program designed to ensure the security and integrity of customer data, protect against security threats and data breaches, and prevent unauthorized access to customer data. **Texas.gov undergoes intensive internal and external audits on all 1,000+ services**, maintaining compliance with the standards listed below.

To protect the security of our partners and customers, Texas.gov fully complies with federal, state, and industry security standards.

- **PCI - Level 1 Merchant**
Payment card industry data security standards for **600+ Merchant IDs**
- **ISO 27002**
International information security standards
- **SAS 70/SSAE 16**
National data center and auditing standards
- **HIPAA**
Federal protections for personal health information
- **TAC 202**
State agency and higher education IT security standards
